

QuickScan[®] QS6500BT *Power Supply Caution*

The QS6500 BT base station USB cable and/or Keyboard wedge cable are intended solely for device communication with the host and not as a primary source of power. If the base station is NOT connected to a separate power supply, DO NOT place the scanning device in the base station as damage may occur to any host that allows the base station to draw more than 500 mA when charging. The scanning device should ONLY be charged in the base station when connected to a separate power supply.

Datalogic Scanning, Inc. shall not be liable for any damages to equipment that results from improper connection of the scanner and base station to the host.
