

Integrated PC Platforms

PC's can be easily and securely attached to your cash drawer using one of MMF's **Integrated PC Platforms**. Designed to quickly attach to your MMF or IBM cash drawer, the platforms provide a secure enclosure for PC's and drives while providing a large surface area for your POS keyboard, printer and display. The unified system also offers excellent cable management and storage capacity and can provide hundreds of dollars of savings per lane in installation costs.

Generic IPCP

**ClamShell
IPCP**

To better service the PC, MMF's ClamShell Integrated PC Platform (IPCP) features a rear hinge that allows the platform to be raised and the PC accessed. Designed to mount to MMF's MediaPLUS™ Cash Drawer, the ClamShell IPCP securely holds the PC on the inside and a best of breed printer, keyboard and display on its surface. Available in black, cool white, putty and storm gray, the ClamShell IPCP is one of several integrated PC platforms designed to fit MMF Cash Drawers.

**IBM
IPCP's**

MMF's IBM IPCP's allow you to upgrade your clients' new or existing IBM systems to take advantage of the savings offered by using "best of breed peripherals" - savings that can be worth hundreds of dollars per lane. Check out these IBM solutions:

SurePOS 500 Platform

IBM Peripheral Platform

SurePOS 300 Integrated PC Platform

IBM Custom Integrated PC Platform

**Generic
IPCP's**

PC's can be easily and securely attached to your cash drawer using MMF's Integrated PC Platform. Designed to quickly attach to an MMF Heritage 240 drawer, the platform provide a secure enclosure for PC's and drives while providing a large surface area for your POS keyboard, printer and display. The unified system also offers excellent cable management and storage capacity and can provide hundreds of dollars of savings per lane in installation costs..
